

Foundation Year Computer Science:

Project Report and Website Design Marking Criteria - 2022

The overall aims of the Website – what was the purpose of the Website? What did it set out to achieve? [5%]

Brief context – background information/relevance on website design and technologies [5%]

The design of the Website - structure, navigation, visual aspects [25%]

- How have you organised the information?
- How easy is it to navigate through your website?
- What visuals were used to clarify and support your claims?

The technical aspects of the Website [25%]

- How does it work?
- What web techniques/technology was used? Why?
- What are the main learning outcomes as a group?

Conclusions: select and summarise relevant information with concluding comments /summary of findings, reflections and with reference to significance, applications, limitations, areas for improvement or further work. [20%]

Referencing: sources are accurately cited and referenced using recognized referencing system e.g. Harvard or IEEE (Please have a look at using Bibtex and NatBib in LaTeX, and look at the University Library referencing resources) . All hyperlinks work correctly. [10%]

Quality of writing: a formal, impersonal style is used throughout. Academic terminology relevant to the topic has been used appropriately. Writing is accurate in terms of spelling, grammar and punctuation. [5%]

Overall Presentation of Report: appropriate format, font style, use of headings and sub-headings, neatly presented. [5%]
